WORK EXPERIENCE

Valence (Previously ChatGeneT)

San Francisco, CA

Co-founder, Agent Marketplace

Nov 2024 – Present

- Co-founded **\$1M angel-backed AI company**; built **ChatGeneT**, an **AI clinical-training simulator** deployed across 30+ hospitals and 500+ junior clinicians with 4.5/5 CSAT, then pivoted the company into **Valence**, an **expert-agent marketplace** for turning specialized workflows into AI agents
- Built ChatGeneT's **evaluation and QA system** for realistic multi-turn clinical simulations, including dialogue taxonomies, annotation standards, synthetic data workflows, release gates, hallucination checks, and UAT; reduced hallucination rate to **0.31%** and achieved **0.87 anthropomorphism score**
- Defined Valence's core **teach-test-publish loop**, enabling experts to codify workflows, test agent behavior, and publish domain-specific agents; seeded marketplace supply by building 10+ agents and curating 45–70 more across expert categories
- Owned **product design and AI-assisted frontend execution** across the marketplace, translating ambiguous builder and user workflows into homepage narrative, agent studio interactions, marketplace discovery, and agent detail pages; shipped production React/Next.js changes with Claude Code
- Built **Repurpose**, an **AI GTM automation system** that repackages long-form expert content into platform-native posts, analyzes engagement and comments, and feeds learnings back into content strategy, agent positioning, and marketplace supply decisions

Commure (Enterprise AI, Series D Unicorn)

San Francisco, CA

Product Manager, AI-Powered Enterprise Platforms

Oct 2023 – April 2024

- Led product discovery across billing workflows at **150+ healthcare organizations** and translated domain insight into an AI-assisted coding workflow with human review, driving **20% revenue uplift and 25% fewer denials**
- Identified churn risk signals through customer interviews and data analysis, defined key health score thresholds, and pitched and led the build of an ML-driven scoring model, reducing churn by **50%** and closing **\$2M in revenue gaps**
- Defined success metrics benchmarking AI output against both industry standards and 3 years of historical claims data; designed CPT suggestion output with confidence scores, medical necessity evidence, and missing information flags to enable efficient human review

JPMorgan Securities

New York, NY & San Francisco, CA

Product Manager & AI Strategy, Research Portal

Sep 2021 – Sep 2023

- Identified an untapped alt data source in earnings calls and policy audio; independently pitched, designed, and delivered an end-to-end speech-to-signal AI pipeline; improved LLM fine-tuning precision by **30%** and generated **\$5M in new revenue**
- Led 0-to-1 build of real-time research feed with NLP-powered tagging and personalized recommendations; growing DAU **15x** and ranking **#1** in annual client survey
- Increased trading volume by **30%** and profit by **45%** by leading data strategy for a trade-recommendation engine, defining ground-truth standards, and operationalizing labeling workflows across large-scale unstructured client conversations

Société Générale

New York, NY

Product Manager, Trading Platform & Algorithms

Feb 2019 – July 2021

- Identified via user interviews that a single missing feature drove 50% of flow to competitors; redesigned interaction model to ship a lightweight alternative, unblocking engineering and driving **300% user growth, 170% trading flow increase, and 120% profit uplift**
- Identified cross-platform pricing as an optimization problem, proposed and led the development of an ML-based dynamic pricing algorithm. **Impact: improving overall profitability by 20%**

EDUCATION

Georgia Tech, *MS in Computer Science, AI concentration (GPA: 4.00/4.00)*

Sep 2024 – Dec 2025

Coursework: ML, DL, NLP, Agentic AI, LLM, HCI

AI Research: *Decoding the Beige Book*, **ACM ICAIF '25 Oral Presentation**; converted 526 Beige Book documents and 56,000+ topic entries into machine-comparable macro risk signals through taxonomy design, annotation standards, LLM evaluation, and temporal masking; achieved peak F1 of 0.89 in recession nowcasting

Columbia University, *MA in Mathematics of Finance (GPA: 3.84/4.00)*

Sep 2017 – Dec 2018

Nankai University, *BA in Economics*

Aug 2013 – Jun 2017

SKILLS & INTERESTS

Product: user research, workflow design, requirements & PRDs, prioritization, roadmap planning, experimentation

Applied AI: prompt design, model evaluation, human-in-the-loop systems, AI prototyping, hallucination mitigation

Analytics & Tools: Python, SQL, Retool, Looker, Tableau, Power BI, Figma

Technical: PyTorch, LangChain, LangGraph, Claude Code, JavaScript, C++

Languages: Mandarin (Native), English (Fluent)
